ineoPRINT

Want to print easily from
your smartphone or tablet?

Have you noticed how difficult it can be to print from a smartphone or a tablet? As mobile working practices become more commonplace in many companies, this can be a big drawback. The problem lies in the incompatibility between mobile devices and office printers or multifunctional devices. In many cases, office workers have to return to their desk to print a document, which is an inconvenient waste of time. The good news is that DEVELOP has the answer to this problem – the mobile app ineoPRINT.

Print and scan in mobile mode

This free app for iOS and Android smartphones or tablets is a fast, easy-to-use answer to the mobile printing needs of office users. You can simply download it to your mobile device and then use it to print documents on a large variety of ineo devices or scan documents from the ineo systems to the mobile app via a Wi-Fi connection.

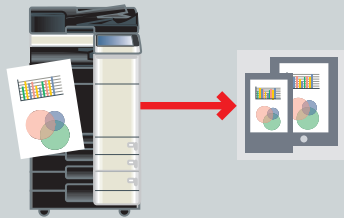

Manage your documents conveniently

You can also use ineoPRINT to store and manage documents in one place and access cloud storage platforms like iCloud, Google Drive, SharePoint, Office 365, Dropbox and Evernote if your documents are stored there. What's more, a QR code and NFC device discovery function allows you to locate the ineo system you want to print from. Nothing could be more convenient!

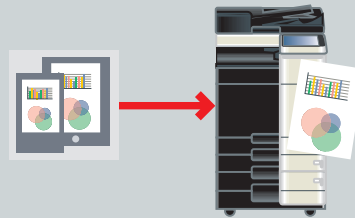

Scan document to smartphone/tablet

- Converted to PDF, JPG etc.

Print document from smartphone/tablet

- Supports PDF, JPG etc.
- Various finishing settings: duplex, punching, staple etc.

Upload documents to Cloud from smartphone/tablet

Download documents from Cloud to smartphone/tablet

Key features

- Direct printing to and scanning from most ineo devices via Wi-Fi
- Convenient storage and managing of documents
- Connects to most popular cloud storage platforms: iCloud, Google Drive, Dropbox, Evernote, SharePoint and Office 365
- Web browsing and printing of web sites
- Flexible discovery of ineo devices:
 - > Manually – via IP-address or DNS
 - > Automatically – network search with all devices being discovered and displayed in the app
 - > QR code scanning – instant device discovery and connectivity
 - > NFC pairing – automatically opens up ineoPRINT and lets you connect to the ineo device
 - > Preview function for print and scan files

Key benefits

- Enables a more flexible, mobile work style
- One app to print, scan, store and manage business documents
- Intuitive usability
